# **BUDGETARY POLICIES**

---

The budget process provides the primary mechanism by which key decisions are made regarding the levels and types of services to be provided within estimated available resources. Budget policy guides this process and directs the City's financial health and stability.

At a minimum, the City shall adopt annual balanced budgets for the general fund, each special revenue fund, and each debt service fund in accordance with the Official Code of Georgia, O.C.G.A. 36-81-3. Georgia law also requires a project-length balanced budget for each capital projects fund.

The annual proposed budgeted should be submitted to the governing authority while being held at City Hall for public review/inspection in accordance with O.C.G.A. 36-81-3. A public hearing will be conducted after proper advertisement prior to the City Council adopting and approving the annual budget document (O.C.G.A. 36-81-5 and 36-81-6).

## **BUDGET OBJECTIVE BY TYPE OF FUND**

The following budget objectives are established for the different funds the City uses:

### *General Fund*

The annual budget for the General Fund shall provide for the general government operations of the City and maintain working capital necessary for financial planning and managing the resources of the City.

### *Special Revenue Fund(s)*

The City adopts annual budget for each special revenue fund that demonstrates any legally

restricted revenue sources are used consistent with the applicable laws and/or regulations (i.e. Hotel/Motel Tax Fund).

### *Capital Project Fund(s)*

The City adopts project budgets for each of its capital project funds. These adopted appropriations do not lapse at the end of a fiscal year; rather they remain in effect until project completion or re-appropriation by City Council.

### *Debt Service Fund(s)*

The City adopts annual budgets for any debt service fund. Any remaining fund balances from prior years plus current year's projected revenues shall be sufficient to meet all annual debt service requirements.

### *Proprietary Funds(s)*

Although generally accepted accounting principals (GAAP) and Georgia statutes do not require the City to adopt budgets for enterprise funds, the City does adopt budget a for enterprise funds in order to monitor revenues and control expenses. The City uses a business approach when budgeting enterprise funds. Enterprise funds shall be self-supporting whenever possible and subsidized losses will be minimized when break-even is not possible.

Additionally, the City classifies funds as either operating funds or non-operating funds. Operating funds are those funds that include appropriations for the payment of salary and benefits and whose maintenance and operating appropriations are necessary to continue the daily operations of the City. The General Fund will always be an operating fund. Non-operating funds are those funds that do not include appropriations for the payment of

salary and benefits and whose maintenance and operating appropriations are not critical to the daily operations of the City.

#### BASIS OF BUDGETING

Neither GAAP nor Georgia statutes address a required basis of budgeting; however, the City shall adopt budgets in conformity with GAAP for all budgeted funds. All governmental funds shall use the modified accrual basis of accounting. Proprietary funds shall use the accrual basis of accounting with the exception that debt principal payments and capital outlay are budgeted and depreciation is not for budgeting cash flow purposes.

#### BALANCED BUDGET

A balanced budget is defined as one in which total anticipated revenues plus that portion of fund balance in excess of authorized reserves that is designated as a budget-funding source shall equal total estimated expenditures for each fund.

The City shall avoid budgetary procedures that balance current expenditures through the obligation of future resources. The City shall avoid short-term borrowing to meet operating budget requirements, except as authorized by the Mayor and Council.

Revenues include those which are due for the current year. Expenditures appropriated by the annual budget include items for which disbursements are made or incurred during the fiscal year through the payables process.

All operating budget appropriations shall lapse at the end of the fiscal year. Purchases encumbered in the current year, but not received until the following year, must be

charged against a department's subsequent year appropriation.

#### BUDGET ADOPTION AND CONTROL

All budgets shall be adopted at the legal level of budgetary control, which is the department level within each individual fund. The City budget is adopted annually by resolution of the Mayor and Council before the beginning of the new fiscal year. In accordance with O.C.G.A. 36-80-21, as soon as the City has adopted a final budget for an upcoming fiscal year, a copy of the budget shall be electronically transmitted in a PDF file to the Vinson Institute and posted on the website accessible to the public. The PDF should be transmitted no later than 30 calendar days following the adoption of the budget resolution.

The budget shall be developed based upon "line item" expenditures within each department. This type of budget focuses on categories of expenditures such as personal services, purchased services, supplies, capital outlay, etc. within each department. At a minimum, each department's appropriation in each fund shall be detailed within the budget document (O.C.G.A. 36-81-3 and 36-81-5). Departments are based on function and activity classifications in the Georgia Department of Community Affairs chart of accounts.

A system of budgetary controls shall be maintained to assure adherence to the budget. Timely quarterly reports shall be prepared comparing actual revenues and expenditures/expenses with budgeted amounts to be distributed to the Mayor and Council.

## AUTHORIZATION OF BUDGET ADJUSTMENTS AND AMENDMENTS

The budget is a dynamic rather than static plan, which requires adjustments and formal budget amendments as circumstances change. The Mayor and City Council must approve all amendments in total departmental appropriations by resolution.

The budget officer can make reallocation of budgeted amounts within expenditures/expenses of a department or revenues of a department. The City Administrator shall be the constituted budget officer for the City. Adjustments from appropriations that have been restricted, committed, or assigned for a designated purpose shall not be transferred until a formal de-obligation occurs.

Budget amendments or reallocations are recorded in the general ledger upon approval by the Mayor and Council or City Administrator.

## MAINTENANCE AND REPLACEMENT OF CAPITAL EQUIPMENT

The budget for capital expense shall be incorporated with the current year operating budgets for each fund, and shall be funded by current operating revenue to the extent possible. An itemized listing of capital expense, equipment and projects shall be included in the budget document.

## BUDGET STABILIZATION & FUND BALANCE POLICY

The City shall strive to establish a fund balance reserve in all operating funds for working capital. The purpose of working capital is to cover the cost of expenditures caused by unforeseen emergencies, cover shortfalls

caused by revenue declines, and to eliminate any short-term borrowing for cash flow purposes. This reserve shall accumulate and then be maintained at an amount that represents no less than three (3) months of operating and debt expenditures (approximately 25% of budgeted expenditures.) Non-operating funds do not need a reserve for working capital.

If necessary, the City may use unrestricted fund balance as a funding source for that fund's budget in any given year. The amount of unrestricted fund balance shall be estimated conservatively, taking into consideration future year needs. The minimum requirement for the reserve for working capital, equal to three (3) months of operating and debt expenditures, must first be met before utilizing the excess fund balance as a funding source for the budget. The utilization of fund balance shall be deemed a use of one-time revenues for budgeting purposes.

## CONTINGENCY LINE-ITEM

The City shall establish an appropriated contingency of one percent (1%) of the total annual expenditure appropriation in all operating funds in order to accommodate unexpected operational changes, legislative impacts, or other economic events affecting the City's operations which could not have been reasonably anticipated at the time the budget was prepared. Non-operating funds shall not require a contingency reserve appropriation.

This contingency reserve appropriation will be a separate line-item within the budget. This amount shall be subject to annual appropriation. The approval of the Mayor and Council is required before this appropriation can be expended. If approved, the Finance

Director will transfer the appropriation from the contingency line-item to the applicable line item(s) within the applicable department's budget.

#### CONTRIBUTIONS

Unless authorized by City Council, outside contributions to programs operated by City departments shall be subject to the City's accounting and budgetary policies. The City welcomes both unrestricted and restricted contributions compatible with the City's programs and objectives. Any material contribution shall be appropriated by City Council prior to expenditure. Material contributions shall be defined as one-time contributions exceeding one percent (1%) of the department's annual maintenance and operating expenditure appropriation or \$25,000, whichever is less.

#### ONE-TIME REVENUE SOURCES

Non-recurring revenues shall be utilized within the appropriate fund for items relating to non-recurring expenses. The purpose of limiting these funding sources is to eliminate the fluctuations in funding operations with non-sustainable resources. One-time revenues shall be distinguished during the budget process so that a match can be made with non-recurring expenditures.
